Village Survey Results

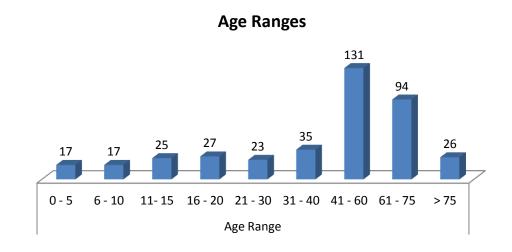

April 2012

The village survey was undertaken by a small group of villagers who wanted to help in the development of a village plan that would shape the future of the village.

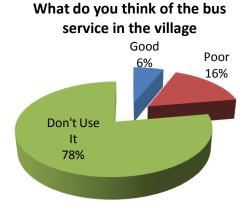

During February a total of 193 survey forms were delivered and 160 were returned giving an excellent 83%. This is the first time a survey of this nature has been undertaken by villagers for the community and there have been some mistakes made in the design of the form and the type of data collected. The raw data is anonymous and can be made available on request.

The key results are detailed below:
